Vega

TLP/2/SP85/R

IP20

DESCRIPTION

The Vega is a high-voltage, high-output 3-hour switchable emergency lighting module designed to suit a wide range of LED types, circuits, and applications. Whilst the Vega is designed for high-voltage LEDs or longer linear applications, it can run certain self-driven lamps, such as GU10s (subject to testing). The unit is designed to work with lithium iron phosphate (LiFePO4) batteries and is supplied in an IP20 enclosure with an easy-access panel for future battery replacement. The module automatically adjusts the output current to provide the best match between the battery and the load, maximising illumination whilst ensuring full battery life. The pack features a green charge healthy/fault indicator LED on a flying lead. This range uses the latest LiFePO4 battery technology, dramatically reducing energy consumption and facilities management labour. The Vega has been independently certified by TÜV, ensuring the products have been tested for safety and comply with national and international regulations.

SPECIFICATIONS

Dimensions	Module: L320mm x W75mm x H31mm
Input Voltage	55-300V
IP Rating	IP20
